WALL STREET, MONDAY, JUNE 23—P. M.

The most significant feature of London affairs is that money in open market has been offered on government securities to the bank and is now 6 percent. On three months' bills the rate of discount in open market was 4 percent below that of the bank. The five-twenty bonds of the issue of 1867 were dull and declined 1/4 percent, the closing price being 92 1/2. Five-twenty of 1868, old, were quoted at 92 1/2, a 1/4, ten-forties at 92 1/2, and new ones at 88 1/2. Erie was quoted at 92 1/2, a 1/4, while the French loan shows an advance of 1/4 percent premium. In Paris rentes were quoted at 66.20. In Amsterdam Pacific Railway shares were 20 1/2, and Central Pacific first mortgage bonds at 84 1/2.

THE MONEY MARKET. While not so active as during several days last week, advanced arms, with good demand, at an average of 4 percent for call loans, and 6 to 8 percent for prime commercial paper. Exchange was steady, hardening toward the close, but with little doing. The following were the prices, with concessions for actual business:

GOLD 115 1/2, 115.

It was not anticipated that gold to-day would even hold its own, the general impression being in favor of a further decline from the prices of last week. Yet, as will be seen, the prices show a better advance of strength toward the close of the day than during the morning hours. Several significant purchases are reported to have been made in the face of the approaching government disbursements, and rumor hath it that a new pool has been organized for a fresh experiment. The report is given for what it is worth. The course of fluctuations during the day will be observed in the following table:
